HORTICULTURE / VEGETABLE GROWING.....10-59

- Pest protection
- Protection against climatic hazards
- Weed protection
- Tarpaulins

ARBORICULTURE.....60-81

- Pest protection
- Protection against climatic hazards
- Harvest netting

WINE GROWING.....82-95

- Grape Protect : protection against hail
- Gel Protect : protection against frost

ANIMALS.....100-129

- Aviary netting
- Pisciculture netting
- Anti-birds nets and spikes
- Anti-cats protection
- Heliciculture netting
- Amphibians netting
- Nets for macro-insects and game

GREEN SPACES.....130-163

- Privacy nets
- Windbreak nets
- Shade sails
- Skip nets
- Landscape fabrics
- Protective tarpaulins
- Backstop nets & others sport nets

General terms	164
----------------------------	------------

Alphatex, a manufacturer of nets, tarpaulins and accessories, is a leading supplier of these products in Europe. Customer support and care are the heart of our product and service offering.

Alphatex is born 25 years ago and gained a great expertise in the design, manufacture and import of these products. The company has commercial experience in the construction, pest control, shrink wraps, horticultural and arboricultural sectors.

Alphatex is a global leading company in the netting sector, specially in the French and European market thanks to its ability to adapt and develop its products ranges to serve a wide variety of purposes.

Alphatex keeps on developping its international leadership by selling its products on 4 of the 5 continents.

In 2025, Alphatex inaugurated its new premises. It is a strategic change, marking a new era of growth, proximity and efficiency. This building has been made to reflect its values and meet the challenges of tomorrow. It is :

- Equipped with two 500kWh photovoltaic power stations and ten electric charging stations, which are powered by these panels. This embodies our commitment for a clean mobility and energy production.
- Surrounded by 200 trees, beehives and shelters for amphibians, recreating a genuine living ecosystem.
- BREEAM certified with an «Excellent» rating, highlighting its energy efficiency and environmental friendliness.

To keep on going toward the right direction, our entire sales team now drives hybrid cars running on E85 fuel, which has a significantly reduced our carbon footprint.

Finally, we have also become members of the CPA (Plasticulture and Agro-Environment Committee), an organisation that promotes an ethical and responsible use of plastics in agriculture.

A new building combining modernity and efficiency

OUR ASSETS

THE CONTROL OF OUR SUPPLIES

We have our own machines that work for our needs and, in parallel, we work with partner suppliers we have trained to manufacture our products according to our technical criteria.

We support their development by investing in their tools and production equipment. This is made possible by our regular presence in the factories.

A PERMANENT STOCK

We have the largest stock of nets in Europe with 3,000 tons, i.e. 60 millions sqm of finished and/or semi-finished products.

A WIDE AND COMPLETE RANGE

Each market has several types of nets, with specific wire diameters, weights, dimensions, colors and finishes.

THE MANUFACTURING

A manufacturing service allows us to respond quickly to requests for custom-made nets.

France

The Alphatex Sales Team operates throughout France, providing individual solutions at best prices. Our male and female team members are most of all technicians who value the sense of closeness and availability. These professionals listen intently to the needs of their clients. They are distinguished by the accuracy of the technical solutions they propose, field-presence and monitoring projects until their completion.

We provide a designated account manager for each client and for each project.

International

Our Sales Teams are also active internationally. With presence in over 50 countries, our sales representatives are fully aware of the specific nature of each of the markets we operate on, both in relation to cultivation, agricultural practices as well as our products' resistance to differing effects of UV light.

Our advisors are fluent in multiple languages and are available to our clients for any and all project analyses.

Customized netting

Every field has specific needs. That's why at Alphatex, we offer custom-made nets that are perfectly suited to the needs of your business. Whether you need larger nets, or special sizes, we adjust our products to give you the best results. We guarantee robust, durable and high-quality solutions, whether you need to protect your crops from pests, wind and any kind of weather, provide shade, etc.

When you choose our custom-made nets, you benefit from 30 years of experience!

CONNECTING THROUGH OVERLOCK STITCH

This is a quick connection of micro-mesh nets made to create customised sheets (used e.g. for wind or sun protection). In the case of light products, it is necessary to apply overlock stitch on the side reinforcement. For heavy products (from 150 g up), nets can be installed outside these tapes, because the amount of the material is sufficient to ensure proper resistance. **Overlock stitch on the edges** : The purpose is to strengthen the mounting or allow better identification of edges in large nets. This is a method which we regularly apply in our large nets.

CONNECTING BY SEWING

Double flat stitch :

It can be applied in micro-mesh nets, where the quantity of material is important for ensuring good resistance.

The net is first folded over itself to be stitched with two needles, and thus created fold is then folded over and stitched again. This method is applied only on woven nets of at least 16/10 (INSECTIS 110g/sqm), which are intended for cages, endwalls, openings in structures, etc. Although time consuming, this method ensures waterproofness and durability.

NETTING WEIGHTS

Especially useful with separating or wind-protection netting, e.g. in order to allow the passage of people or vehicles. Depending on the netting used: from 200g/m to 800g/m.

LOOPS

Zip fastener, velcro, meshes, adjusted to the needs and method of use. Please, contact us for more details.

INSTALLING REINFORCEMENT TAPES

We only use heavy woven HDPE reinforcement tapes, which are subjected to UV processing in order to obtain optimal durability over time.

We apply them around the edges to ensure the resistance of metal loops or as reinforcement for zip or velcro fasteners to allow space for cable ducts, etc.

The mandatory information to provide for your orders

To ensure that your orders arrive on time and avoid them being returned to our warehouse, please provide the following information when placing your order.

For parcels weighing less than 30kg

Any parcel weighing less than 30kg will be shipped in a cardboard box using express carriers. To facilitate delivery, please provide us with the information listed below.

- Postal address
- Name
- Telephone number
- E-mail address
- Portal code if necessary

For parcels weighing more than 30kg

Any parcel weighing more than 30 kg and up to 150 kg will be shipped on a pallet by the carrier DB Schenker.

To facilitate delivery, please provide us with the information listed below.

- Postal address
- Name
- Telephone number
- E-mail address
- If necessary, the tailgate
- Specify delivery conditions (if narrow street, dead-end street...)

Additional information

If a safety protocol must be followed when unloading the goods, please let us know so that our driver can be equipped accordingly.

FINE MESH NETS FOR OPEN FIELD CROPS

END OF PRODUCTION

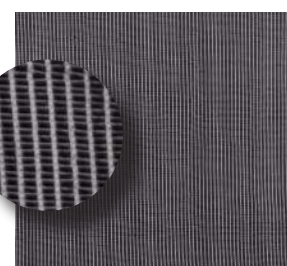

Biotis 450 Stop Flea beetle

Biotex 500

Biotex 800 Stop fly

Insectis 16/10
Potato plants

Our specialist fine mesh protective netting systems for field crops are designed to stop flies, flea beetles and a lot more. These netting systems are very sturdy and can be placed directly on the crops or arches, thanks to their light weights.

We recommend using them for all garden, ornamental and fruit crops. The netting's robustness reduces the effects of wind, hail, and reduces flutter. With its excellent air permeability, the netting does not increase the risks of fungal attacks.

The HDPE hydrophobic netting does not soak through — unlike the multi-fibre PA or PP netting, which can highly increase its weight during rainfall.

Insectis 16/10 is recommended for potato plants.

Manufacturer's advice

CEPP

Everything you need to know about CEPP

Certificate of Saving on Plant Protection Products in France

THE AIM OF THE CEPP IS TO LIMIT THE USE OF PLANT PROTECTION PRODUCTS.

CEPP stands for Certificate of Savings in Plant Protection Products. The aim of this programme is to encourage greater use of substitutes for pesticides and chemicals through the implementation of standardised measures. The level of obligation is calculated based on sales of plant protection products in previous years.

ALPHATEX PRESENTATION

Alphatex has been manufacturing nets for horticulture, market gardening and arboriculture for 30 years. As a specialist and partner to specialist distributors, we can supply you with a range of nets that will enable you to obtain certificates.

These products are : **BIOTIS 450**, **BIOTEX 500**, **CLIMATEX**, **DROSOTIS 8/6** and **ALT'CARPO**.

BIOTIS 450 is a highly effective insect net for turnip, radish, black radish and cabbage crops. It repels small insects, including the tiny Phyllotreta flea beetle, which measures 0.45mm. BIOTEX 500 is also an insect net, but it is mainly designed to repel all types of flies. CLIMATEX, on the other hand, is a climate net. Ideal for the beginning and end of the season.

DROSOTIS 8/6 crystal is an anti-moth net, as its name suggests. ALT'CARPO net has been designed to repel codling moths.

WHO IS CONCERNED ?

The entities concerned by the CEPP are persons (known as obligated parties) who sell plant protection products for agricultural purposes.

HOW TO DO IT ?

To declare the actions completed, you will need to go to your personalised space. In this space, you can simulate actions to estimate the number of certificates generated, declare the actions completed, or consult the status of the certifications obtained.

HOW CEPP WORKS ?

Agricultural distributors selling plant protection products are now required to take action to comply with the CEPP.

There are 120 such actions, which are defined as follow :

- the nature of the action
- documents justifying the action to be taken, which must be submitted
- documents to be archived and kept available for inspection by the relevant authorities
- the annual number of CEPPs
- the number of years during which the share entitles the holder to receive certificates

To report the actions you have completed, you will need to go to your personalised space. You will find several other features in your space (see How to do it ?).

But, how does it work in practice ?

As mentioned above, the turnover generated by the sale of plant protection products in previous years determines the level of obligation.

The more products you sell, the more certificates you will need to collect. Each action taken will earn you a certain number of certificates. This number will depend on the product sold and the quantity sold.

To simplify :

- Phytopharmaceutical products are recorded in NODU (Number of Dose Units)
- Eco-friendly products are recorded in CEPP (Certificates of Savings in Plant Protection Products)

The number of CEPPs obtained (which results from the actions taken) must represent 15% of the NODUs determined.

FOR EXAMPLE

Here, we present a simplified example to help you understand how CEPPs work.

If you sell an average of 1,000 litres of plant protection products, this would correspond to 10 NODU.

To compensate the sale of these 10 NODUs, you will need to obtain 15% of this value in CEPP.

In other words, to comply with the new legislation, you will need to collect 1.5 CEPP (15% of 10) through standardised actions.

Alphatex products eligible for the CEPP

INSECTS PROTECTION NETS FOR GREENHOUSES

Our nets are monofilament woven insect protection for crops grown inside greenhouses.

We recommend the use of these nets on all vegetable, ornamental, and fruit crops grown in greenhouses.

Our HDPE nets are water-repellent, so their weight does not vary due to water, unlike PP, PA, PLA nets, etc. In addition, a UV stabiliser has been added to the material to extend its lifespan.

Product	Mesh	Constr.	UV Treat.	Color	Width	Length	Finishes	Weight
Drosotis 8/6	Rectangular 1180μ x 1750μ	Monofi- lament woven	600 KLY	Green/ Black	1.3 m	200 m	Top and bottom reinforcements on 4cm	90 g/sqm
				Green/ Black or Crystal	2 - 2.5 - 3 m	200 m		
				Crystal	1.3 m	300 m		
				Green/ Black or Crystal	4 m	200 m	Top and bottom reinforcements 4cm + middle 3cm

Climatex

CLIMATE NET

Climatex

Climatex is a climate net designed to recreate ideal conditions for each crop at the beginning and end of the season. Compared to frost protection fleece, Climatex :

- ✦ Provides effective protection against frost as well.
- ✦ Prevents the appearance of a warm and humid microclimate during the day, thanks to its good ventilation and hydrophobic HDPE.
- ✦ Has a longer lifespan thanks to its UV treatment.
- ✦ Is the heaviest and most tightly woven net on the market (42g/m²).

HDPE

Product	Mesh	Constr.	UV Treat.	Color	Width	Length	Finishes	Weight
Climatex	Triang. >900μ	Knitted 100% strips	600 KLY	Crystal	12 - 14 - 16 - 18 - 24 - 32 m	100 m	Top and bottom reinforcements on 5cm	42 g/sqm
					26 m	150 m		
					15 - 28 m	200 m		
					2 - 4 - 6 - 6.5 - 8 - 10.5 - 12 - 14 m	250 m		

VIDEO - Presentation and
installation tutorial

MANUFACTURER'S ADVICE

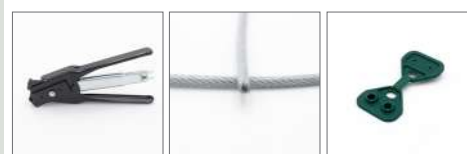

The main advantage of Climatex

With a weight of 42 g/m², Climatex is the heaviest climate protection net on the market. But what does that mean? Its greater weight makes it more resistant and gives it a longer lifespan. Moreover, it is still light enough for plants to lift the net as they grow.

Would you like to know more about it ?

So take a look now at our double-page spread dedicated to Climatex, right after this.

Accessories on page 43

Manufacturer's advice

Focus on Climatex

Our Climatex net aims to recreate the ideal conditions for your crops. It is mainly used when frost appears, in order to conserve heat below. This is an excellent product for accelerating plant growth. Climatex also prevents buds from drying out during frost. The strip deflects the wind, preventing drying out as well and wind damage.

WHAT ARE THE CHARACTERISTICS OF CLIMATEX ?

Climatex is the ideal netting for the beginning and end of the season. It helps to anticipate the onset of frost by retaining heat.

- ✦ Made from **100% HDPE**, it is reusable and recyclable.
- ✦ Its weight and quality are **above average**.

CLIMATEX, THE HEAVIEST NET ON THE MARKET

It weighs 42 g/sqm for a reason !

STRONG WINDBREAK EFFECT

Climatex is made with strips that deflects the wind, thereby limit the effect of wind buffeting.

PLANTS DO NOT GROW THROUGH THE NET

It prevents some insects from getting under the net thanks to its tight mesh, but it also allows seedlings to grow by lifting the net.

DOES NOT INCREASE THE RISK OF DISEASE

Made with HDPE, Climatex is hydrophobic and does not release moisture while drying. This means it does not increase the risk of fungal diseases.

PROTECTION AGAINST CLIMATIC HAZARDS

HOW TO PROPERLY INSTALL THE CLIMATEX?

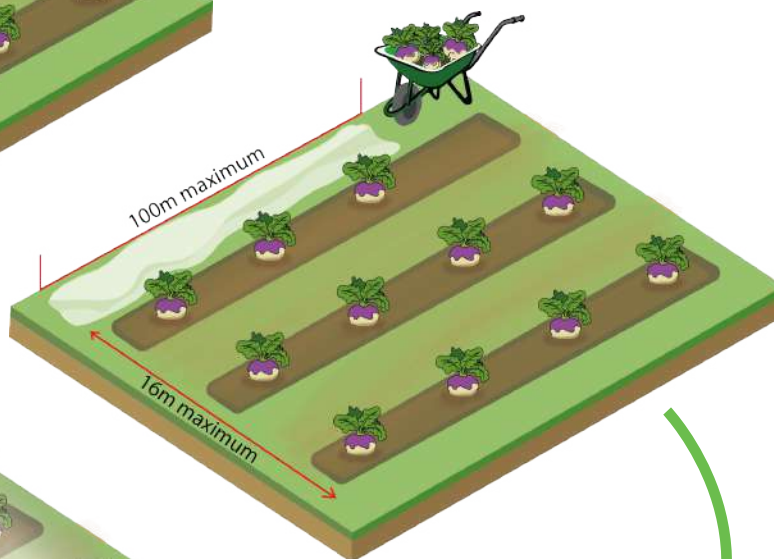

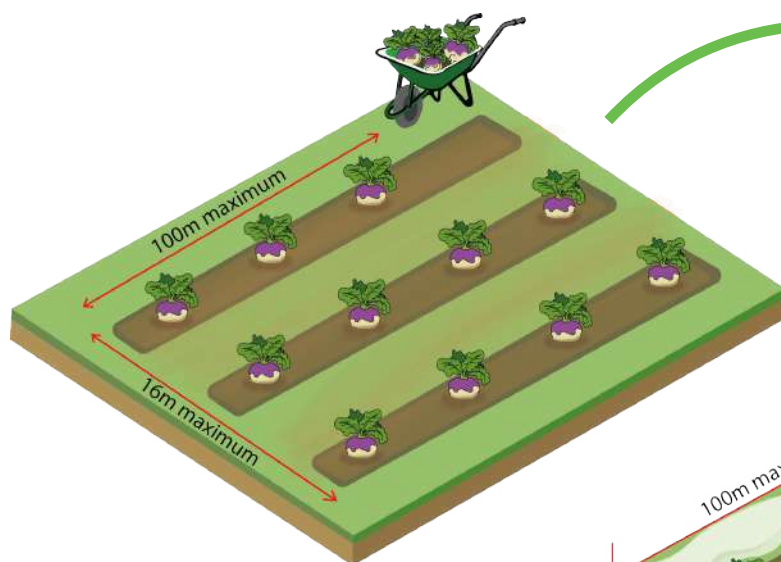

When choosing the size of your net, remember to choose one that is slightly larger than the area you want to cover. This will give you enough slack to bury the sides and allow your plants to lift the net as they grow. It is important to follow these steps because this net is made with triangular meshes and needs to be stretched to reach the specified dimensions.

Warning : if you want to cut the net, you must stretch it beforehand, otherwise the dimensions will no longer be accurate.

For example, if you are using a 16m x 100m net:

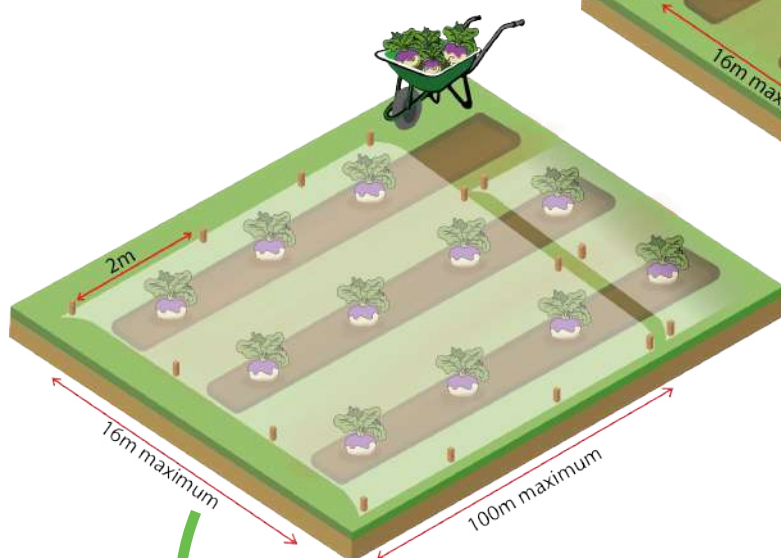

Step 1 : Mark the ground

To ensure compliance with the length and width indicated on the label.

Step 2 : Unroll lengthwise

Do not exceed the 100 m previously marked.

Step 3 : Unroll widthwise

Gradually secure the net every 2 metres, while stretching it over 16 metres.

VIDEO - Installation tutorial

To learn more about our Climatex net, our sales teams are available to discuss it with you.

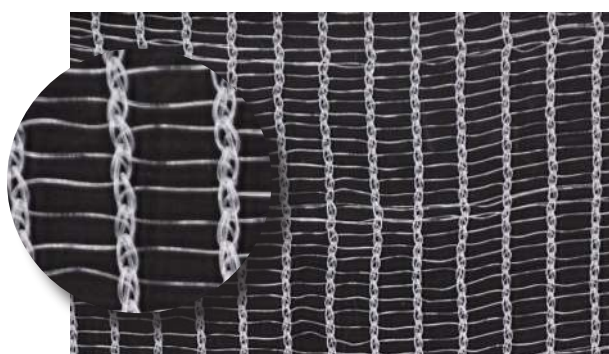

Alphavent 30

Alphavent 35

WINDBREAK NETTING

30% - 35%

Alphavent 30

Alphavent 35

Our windbreak nets are designed to be mounted on structures such as greenhouses, green-houses, climate sheds or on the fences of field crops.

Nets with 20-35% of wind protection are light and airy solutions, providing improved ventilation in low tunnel models. These netting systems are often used in order to prevent impacts on the side wings of greenhouses.

We can also manufacture specific products which are not found in our standard offer, with various mesh sizes, colors and weight/m². Please, contact us for more details.

Alphavent 35 is available in a fire-treated version for outdoor applications or for public utility facilities.

Manufacturer's advice

Windbreak netting installation

GENERAL INFORMATION

The effective surface area of a windbreak net is approximately 10 times its height. This means that a 4-metre-high net will protect a 40-metre-long plot of land.

ALL THE STEPS INVOLVED IN INSTALLING A WINDBREAK NET FOR A WEATHER SHELTER ON A FENCE

As a net manufacturer, Alpatex has also acquired expertise in installation, enabling us to provide you with the best advice. Creating a weather shelter using fencing is an effective way to quickly protect yourself from the wind. To do this, you will need the following accessories :

- | | |
|---|------------------------|
| 1. 6-metre high posts, 15/17 diameter with tapered ends | 6. Protective sleeves |
| 2. Screw-in anchors | 7. Windbreak net |
| 3. Slings with a diameter of 6mm and a length of 5m | 8. DELTEX cable 4x2 mm |
| 4. 6 mm cable clamps | 9. 40 mm clamp |
| 5. Coil tubes | |

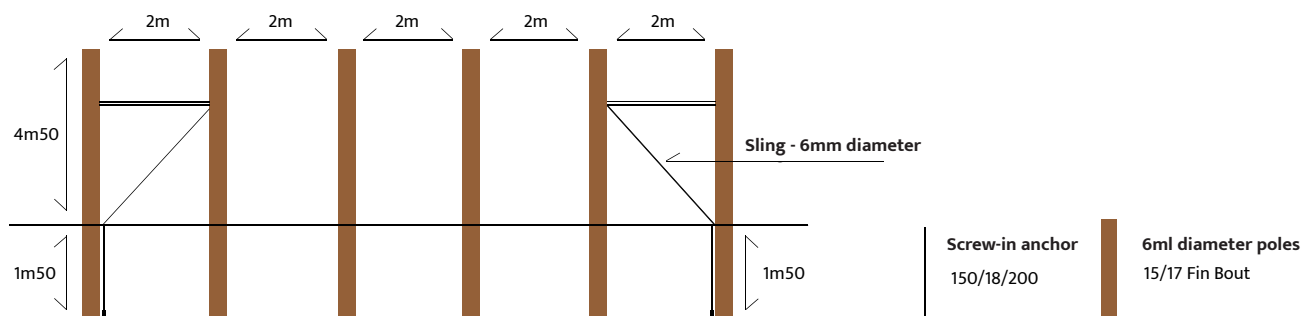

STEP 1 : ESTABLISHMENT OF THE STRUCTURE

First, the structure must be erected using 6-metre posts. Ideally, at least 1.5 metres should be buried in the ground to be firmly anchored in the ground. The posts should be spaced two metres apart, regardless of their height.

Please note that the posts must be smooth and free of knots to prevent abrasion on the net. In addition, a knot that is too deep can weaken the post depending on where it is located, and the post may split in case of strong wind.

Next, you need to install 'chairs' at each end of the structure, or at long intervals: every 100 metres; in order to reinforce the structure. Otherwise, with the tension of the net, the posts at the ends would be under too much strain and would lean towards the centre.

This operation is carried out using a stake, slings and screw anchors, as shown in the diagram below.

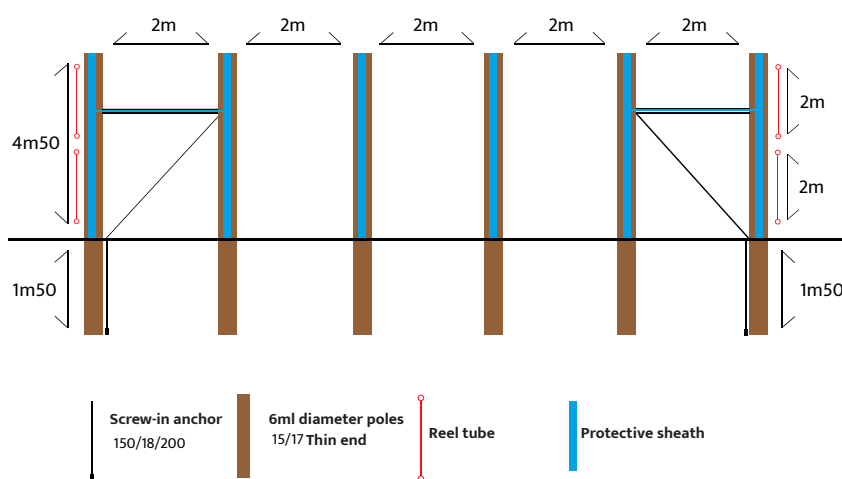

STEP 2 : INSTALLATION OF PIPES AND DUCTS

For this second step, you will need to fit a black PVC protective sleeve onto each pole, using flat-headed nails every 60 cm on both sides of the sleeve, as well as roll-up tubes at each end.

What is the protective sleeve for? The sleeve acts as a bumper to prevent the net from rubbing against the wood (mechanical protection).

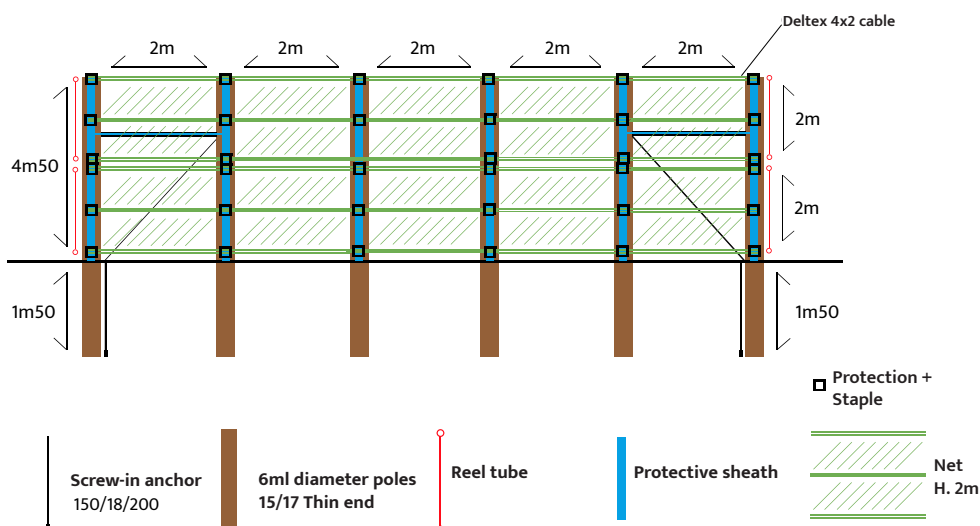

Alphatex offers a roller kit that allows you to adjust the tension of the net (for nets up to two metres high). The tubes allow you to stretch nets up to two metres. In the diagram below, two must be installed at each end to obtain a 4-metre windbreak. The net roller mandrel will then be inserted into it.

STEP 3 : INSTALLATION OF THE WINDBREAK NET

This step involves installing the net on the structure. To do this, you need to :

1. Thread the DELTEX 4x2 cables through each buttonhole in the net.
2. Suspend the net from each post head using clamps installed on the post heads.
3. Tension the cables independently of the net by attaching them to the two end posts with a TIRVIT.
4. Place the net in the winding tube and apply tension by turning the tube.
5. Secure the cables with a cable tie at each intersection of the posts.

UPDATE ON OUR ALPHAOMBRE RANGE

Our R&D and quality control departments have invested in new tools for measuring shade percentages, and they have studied the entire Alphaombre range in order to provide you with accurate values.

Aware of the importance of protection suited to the type of crop, we have taken these measures to give professionals the best products.

Ombrex 55

SHADE NETS

FOR LAMB'S LETTUCE PRODUCTION

TO ORDER

Omboramache 60

END OF PRODUCTION

Ombrex 55

Alphatex has designed a specific range for its customers who need to install nets (manually or mechanically) on garden hoops and tunnels. Omboramache nets are made of monofilament and have a better resistance to roll up and unroll, which increases their lifespan, compared to strip nets. Their quality/price ratio is better as well. We recommend these nets to grow lamb's lettuce and young shoots. Moreover, our monofilament or strip nets provide a high percentage of shade while maintaining effective ventilation for crops.

HDPE

Product	Shade perc.	UV Treat.	Constr.	Color	Weight	Width	Length	Finishes	Packaging
Omboramache 60*	60%	320 KLY	Knitted monofilaments	Black	110 g/sqm	1.80 - 2.10 m	300 m	Side reinforcements	Folded roll with Ø50 mm PVC mandrel
Ombrex 55	55%	320 KLY	100% strips	Green/Black	100 g/sqm	1.6 m	300 m	Side reinforcements	Folded roll with Ø50 mm PVC mandrel

Manufacturer's advice

Which shade net to choose ?

To choose the right shade mesh, you first need to know the characteristics that differentiate the different products in our range.

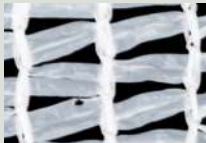

Construction: monofilament or strips

- Monofilament nets are heavier and recommended for use on outdoor structures.
- Strip nets are lighter and are recommended for indoor use, for shading in greenhouses, or directly on crops (depending on the weight of the net, which has to be lighter than 45 g/m²).

MANUFACTURER'S ADVICE

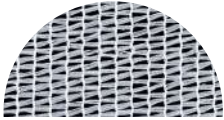

Whether for use in open fields or on structures, Alphatex offers shade nets in monofilament or strip form. Here is a quick reminder of the differences between these two types of product :

MONOFILAMENT		STRIPS	
Weight	● ● ●	Weight	●
Ventilation	● ● ●	Ventilation	●
Mechanical strength	● ● ●	Mechanical strength	●
Outdoor use	● ● ●	Outdoor use	● ●
Indoor use	● ●	Indoor use	● ● ●
Shading capacity	●	Shading capacity	● ● ●

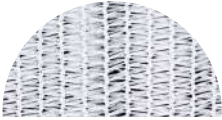

Color : light or dark

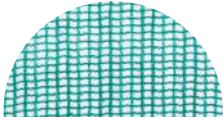

- White nets are particularly used in red fruit crops. Thanks to their white color, light is diffused evenly over the plantations, which improves their development and the red color of fruits.
- Green and black netting provides more shade and is used for crops that need more of it.

LANDSCAPE FABRICS

Floortis 90 ; 100 ; 130

Floortis 90 ; 130

Floortis 90 ; 100 ; 130

Our 100% woven polypropylene mulch fabrics are made with a UV protection for a longer lifespan. The fabric is installed on the ground before planting to prevent weeds from growing. It also helps plants and shrubs to grow. The mulch fabric is permeable to water and air and keeps the soil cool and moist.

Product	UV Treat.	Weight	Constr.	Color	Width	Length	Finishes	Packaging
Floortis 90	600 KLY	90 g/sqm	Woven	Green/Black	1.05 - 1.25 1.65 - 2.10 3.30 - 4.20 5.25 m	100 m	Green stripes every 25 cm (lengthwise)	Folded rolls with mandrel

				Black	3.25 m	5 - 10 - 100 m		1.65 m Rolls

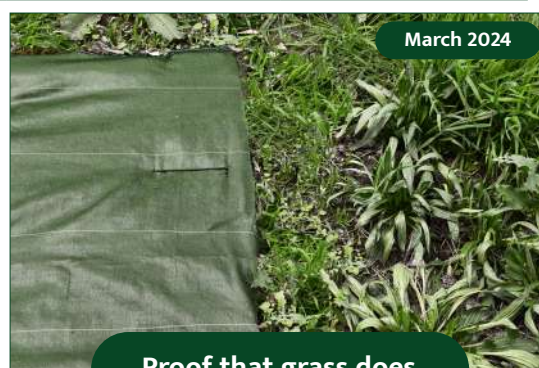

OUR ACCESSORIES

We offer two particularly useful accessories to install landscape fabrics: staples and a thermal perforator. The serrated steel staples, with bevelled ends, are easy to put into the ground and will remain in place for a long time.

The **staples**, made of serrated steel with bevelled ends, enable quick, secure and durable installation of mulching fabric.

The **thermal perforator** is very useful when planting. It allows you to drill holes easily and very quickly.

Proof that grass does not grow underneath!

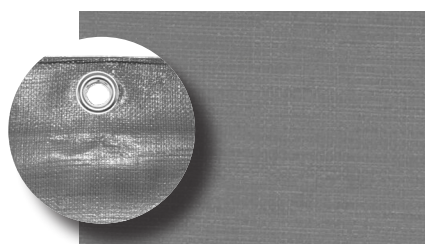

Couvratis 250

Couvratis 150

Couvratis 250

Tarpaulin 650 g/m²

Tarpaulin 650 g/m²

Tarpaulin 900 g/m²

Our catalogue includes both light HDPE and heavy PVC tarpaulins.

Lightweight tarpaulins, from the Couvratis range, are used for short-term needs. They are more economical than heavy tarpaulins.

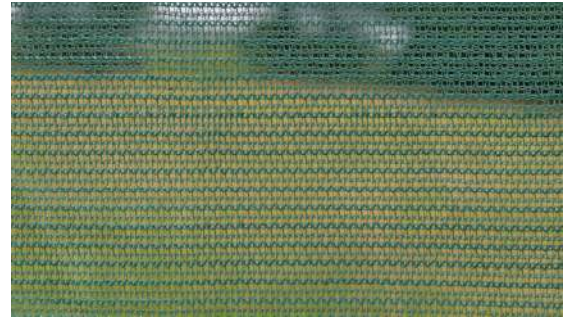

Our 650 g/m² and 900 g/m² protective PVC tarpaulins are well-known for their adaptability, durability and resistance. They can be used to protect equipment, cover agricultural tunnels or even cover skips. They are made to measure according to your plans and specifications, with welded hems and eyelets.

Manufacturer's advice

UV protection treatment

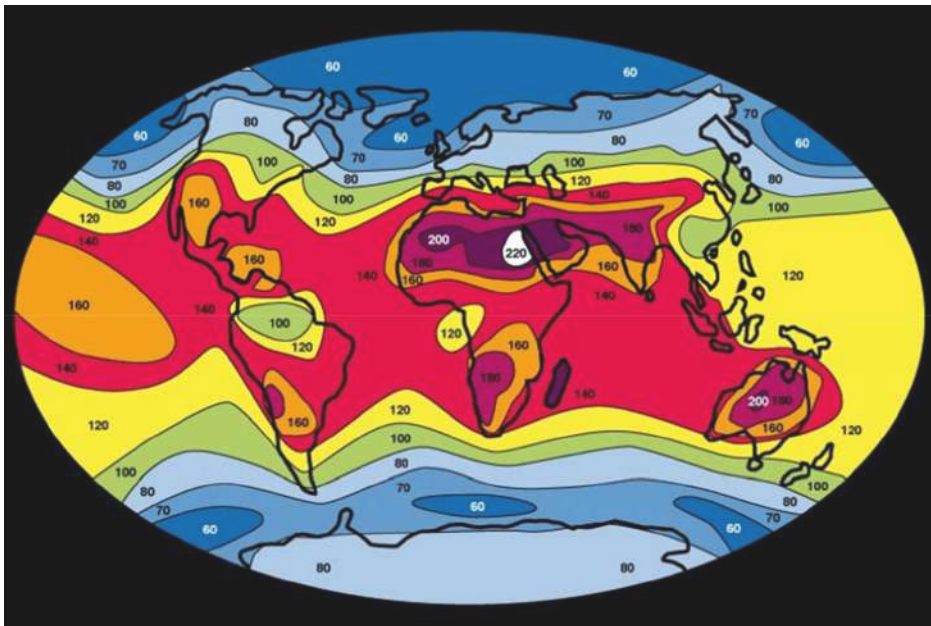

All Alplatex netting are made to ensure resistance to regular exposure to UV radiation. More information in this regard can be found on each of our product under « UV treatment ». This criteria is measured with Kilo Langlay (KLY), a unit to express the maximum level of exposure which our netting can withstand.

UV TREATMENT

The main material used in our netting is high-density polyethylene. This component has many advantageous properties, such as flexibility and mechanical resistance. However, it also comes with a flaw : polyethylene is not particularly resistant to UV light. UV radiation dries the mats, making them brittle.

That is why our manufacturing process includes additives which increase polyethylene's resistance to UV light.

The more additives we use, the higher its resistance. However, it also increases its weight and price.

Global UV exposure (in Kly)

WHAT IS KLY ?

Langley (Ly) is a unit of radiation energy per surface unit equal to one gram of calories per square centimetre. It is mainly used to measure sun radiation on the surface of the Earth.

LIFESPAN OF UV TREATMENT

In France, UV protection treatments are calculated on an annual basis of 80KLY, corresponding to exposure in the Paris region. The amount of additive we incorporate allows our nets to withstand between 300 and 800KLY.

To know how much time the UV treatment will last, you only have to divide : UV treatment / UV exposure of your country.

This allows us to estimate the lifespan of our products in seasons: a 600KLY-treated net can be reused for 5-6 seasons in France (this also depends on the length of the season, installation, friction, etc.).

Our accessories

C OR S CLASP

C or S Gancio clasp.
Sold by 1000 pieces.

Dimension
8x80mm

STAPLES FOR LANDSCAPE FABRICS

Beveled and notched staples for
mulching fabric.
Box of 100 pieces.

Dimension
20 x 20 x 20 cm
Diameter
4 mm

SR8 STAPLES

SR8 galvanised metal staples, B nu.
Box of 2,500 pieces.

P7 STAPLER

Bostitch SR8 stapler with P7
magazine - Installation of wire
mesh, wired or unwired.

SPLIT RING

Broken rings used to attach nets to
wire or cable.
Colors : Grey, Black, White, Green.

Dimension
21x41mm

TENSION CABLED WIRE

Used for installing nets and
tarpaulins on structures or fences.
Material : HDPE cable

Diameter
3 - 4 - 5 - 6 - 8 - 10 mm
Reel length
100 - 200 - 250 - 500 m
Colors
Black - Green - Stone - Green/Blue - Dark green - Aqua green - White - Grey - Red

CORD REEL

Used for installing nets and tarpaulins on structures or fences.
Material : braided HDPE

Diameter
3 - 3.5 - 4 mm
Coil length
100 - 200 - 250 - 500 m
Colors

Black - Green - Green/Blue - Dark green - Aqua green - White - Grey - Red

PVC COATED CABLE

Used for installing nets and tarpaulins on structures or fences.
Material : Galvanised steel and PVC.

Diameter
5 - 6 - 7 mm
Coil length
50 m à 200 m ou à la coupe
Colors

Dark green - Transparent dark green - Black - Light green - White - Grey - Transparent

STAINLESS CABLE

Used for installing nets and tarpaulins on structures or fences.
Material : 7x7 galvanised steel.

Diameter
2 mm
Coil length
100 - 200 m

STAINLESS STEEL CABLE

Used for installing nets and tarpaulins on structures and fences.
Material : 7x7 stainless steel

Diameter
2 mm
Coil length
100 - 200 m

2-POINT CLAMP

2-point bracket, ideal for thick windbreaks and privacy screens.
Bag of 250 pieces.

MOUNTING CLAMPS

Fixing clip for small lightweight windbreaks or privacy screens.
Bag of 150 pieces.

STAPLE

Used to secure nets and cables to wooden posts.
5kg box (≈ 354 pcs).

ROLLER KIT

Windbreak kit.
2 galvanised ring bolts, height 160 mm - thread 65 mm - inner ring diameter 45 mm - tube diameter 38 mm, thickness 2 mm - Supplied with a bolt and 2 cranks (concrete round bar)

Height
2 - 3 m

LOCKING SLEEVES

Aluminium sleeve for cables measuring 0.55 to 0.65 mm. For hail guards and windbreaks.
Bag of 100 pieces.

ALL-PURPOSE PLIERS

Maximum cutting diameter Ø4 mm and crimping of sleeves (maximum Ø2.5 mm).

GALVENISED STIFFENER

Ensures tension in wires and cables.
Material : Galvanised steel

Diameter
2 - 3 - 4 mm
Colors
Green - White - Black

BUNGEE CORD

For attaching nets.
Colors : White, Black.

Diameter
6 - 8 mm
Length
100 m

BUNGEE CORD WITH SNAP HOOKS

For attaching nets.

Diameter

8 mm

Length

0.70 - 1.30 - 1.60 - 1.70 - 1.80 - 2 m

CABLE CLAMP

For hail protection and windbreaks.

Box of 50 pieces.

Material : Galvanised steel.

Diameter

3 - 4 - 5 - 6 - 8 mm

GALVANISED TURNBUCKLE

To properly tension your nets.

Diameter

5 - 6 - 8 - 10 mm

Type

1 ring/1 hook - 2 rings -
2 hooks

RAPID BLOCKER

For tensioning and securing the cable. Double-channel self-locking mechanism.

Dimensions

1.50 to 2.50 mm

INSECT NETS

Drosotis 8/6

Alt'Carpo

NEW

Alt'Tordeuse

Alphatex offers a complete range of insect protection products for arboricultural needs. Our manufacturing team can produce single-plot protection nets or single-row protection nets on request.

Our nets provide effective protection against fruit flies and codling moths, as well as strawberry leaf rollers thanks to our new Alt'Tordeuse net!

Products	Mesh	UV Treat.	Constr.	Color	Weight	Width	Length	Finishes	Packaging
Drosotis 8/6	Rectang. 1180μ x 1750μ	600 KLY	Monofilament woven	Green/ Black ou Crystal	90 g/sqm	2 m	200 m	4 cm top and bottom rein- forcements	2 m Rolls
						2.5 m			2.5 m Rolls
						3 m			3 m Rolls
						1.3 m	300 m		1.3 m Rolls
						4 m	200 m	4 cm top and bottom rein- forcements + 3 cm middle	2 m rolls (crystal) ou 4 m rolls (green/ black)
Alt'Carpo	Rectang. 2.2 mm x 5.5 mm	500 KLY	Monofilament woven	Crystal	67 g/sqm	3 m	500 m	4 cm top and bottom rein- forcements	1.5 m Rolls
						4.2 m			2.1m Rolls
						5.2 m			2.6 m Rolls
						7 m			3.5 m Rolls
						7.5 - 7.7m			3.75 m Rolls
						8 m			4 m Rolls
Alt'Tordeuse	Rectang. 3.38 mm x 2.16 mm	500 KLY	Monofilament woven	Crystal	67 g/sqm	7.5 m	500 m	Side reinfor- cements	3.75 m Rolls
						8 m			4 m Rolls

MANUFACTURER'S ADVICE

Which net for which insects ?

Alphatex offers you an effective and economical solution for controlling insects. Our nets are suitable for all types of crops, but each product is designed to combat different types of insects. Consult our table to choose your product.

Insect	Adult size	Fruit tree	Suitable net
Codling moth	18 mm	●	Alt'Carpo
Leafroller	22 mm	●	Alt'Tordeuse
Drosophila	3 mm	●	Drosotis 8/6

BIRD NETS

Arborex 13

Arborex 15

Arborex 20

Arborex 22

Arborex 25

Bird nets are effective, environmentally friendly and inexpensive way to protect crops, small fruits, late harvests, etc. from the birds damages. Our nets can also be used to protect poultry farms in aviaries.

Made from high-density knitted polyethylene with mesh sizes ranging from 13 mm to 25 mm, our nets allow sunlight and water to pass through. We offer a wide range of standard nets in small and large sizes, and the can also be made-to-measure.

Harvest nets are the most common, practical and easiest way to harvest fruit and vegetables: olives, chestnuts, walnuts and forest seeds. We offer regular harvest nets, but also in a ‘trouser’ shape, which makes them easy to install thanks to its opening at one end. With this feature, you will be able to slide the net around the tree trunk.

Manufacturer's advice

Harvest nets

Alphatex offers a wide range of harvesting nets. Suitable for every farm's budget, our nets are manufactured in different weights and mesh sizes. These differences do not affect the quality of the harvest, but rather the lifespan of the net and how easy it is to install.

WHAT ARE THE ADVANTAGES OF HARVEST NETTING?

The harvesting net for fruit trees, walnut trees, olive trees, and even chestnut trees is an indispensable tool for easily gathering fruit. Its advantages are as follows :

- Very easy to install (especially the trouser-shaped net)
- Significantly speeds up harvesting
- The mesh size allows small fruits to be harvested (olives, walnuts, hazelnuts, chestnuts, etc.)
- Lightweight and easy to handle
- Low maintenance
- Reinforced corners and reinforced stitching around the edges for greater strength
- Highly resistant mesh
- Can be used for several years
- Excellent value for money, this solution quickly pays for itself

TROUSER-SHAPED HARVESTING NET

Thanks to the slit running from the edge to the centre of the net, our trouser nets can be placed all around trees. This makes them easier to install and prevents any losses that might occur with a more traditional installation.

We have designed our 95 trouser harvesting net with eyelets around the edge. These eyelets allow you to thread a rope or bungee cord through to pull the edges of the net together once harvesting is complete. This option also saves time and makes the process more convenient.

ACCESSORIES

In addition to our range of nets, we also sell accessories for smooth and efficient harvesting.

Find these accessories (comb, handle, bungee cord, cable, etc. on p83).

Our accessories

Reference numbers p. 81 - 82

P7 STAPLER

Bostitch SR8 stapler with P7 magazine - Installation of wire mesh, wired or unwired.

SR8 STAPLES

SR8 galvanised metal staples, B nu. Box of 2,500 pieces.

HDPE CABLED TENSION WIRE

Used for installing nets and tarpaulins on structures or fences. Material : HDPE

Diameter
3 - 4 - 5 - 6 - 8 - 10 mm
Reel length
100 - 200 - 250 - 500 m
Colors
Black - Green - Stone - Green/Blue - Dark green - Aqua green - White - Grey - Red

HDPE BRAIDED TENSION WIRE

Used for installing nets and tarpaulins on structures or fences. Material : braided HDPE

Diameter
3 - 3.5 - 4 mm
Reel length
100 - 200 - 250 - 500 m
Colors
Black - Green - Green/Blue - Dark green - Aqua green - White - Grey - Red

PVC COATED STEEL CABLE

Used for installing tarpaulin nets on structures or fences. Material : Galvanised steel and PVC.

Diameter
5 - 6 - 7 mm
Reel length
50 m à 200 m or by weight
Colors
Dark green - Transparent dark green - Black - Light green - White - Grey - Transparent

GALVANISED STEEL CABLE

Used for installing nets and tarpaulins on structures or fences. Material : 7x7 galvanised steel.

Diameter
2 mm
Reel length
100 - 200 m

STAINLESS STEEL CABLE

Used for installing nets and tarpaulins on structures and fences.

Material: 7x7 stainless steel

Diameter

2 mm

Reel length

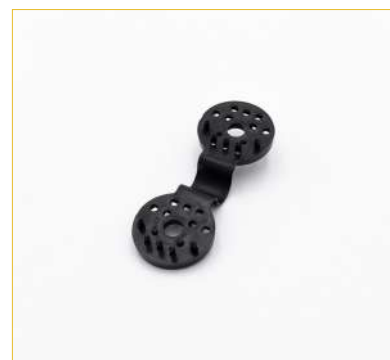

100 - 200 m

COVER

Black cap used to attach Anti-hail and Alt'Carpo nets.

Diameter 10 cm or 12 cm.

ROUND CLIPS

Fixing clip for small lightweight windbreaks or privacy screens.

Bag of 150 pieces.

GALVANISED HEAD NAIL

Galvanised head nail.

Sold in boxes of 5 kg.

Approximately 1,900 pieces.

SLING

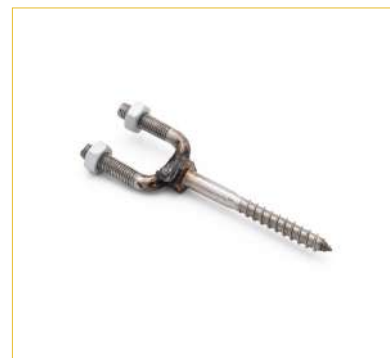

Used for windbreaks, hail protection and Alt'Carpo.

Dimensions

Length 5 m / Loop 6.50 m

Diameter

8 mm

POST HEADER STAINLESS STEEL CLAMP

Accessory for Anti-hail

Sold in boxes of 50 pieces.

PROTECTIVE SHEATH

For Anti-hail and Alt'Carpo.
Sold in bags of 250 pieces.

ROLLER KIT

Windbreak kit.
2 high galvanised ring bolts. 160 mm - Thread 65 mm - Inner ring diameter 45 mm - Tube diameter 38 mm, thickness 2 mm - Supplied with a bolt and 2 cranks (concrete round bar)

Height
2 - 3 m

SLEEVES

Aluminium sleeve for 0.55 to 0.65 mm cable - For hail guards and windbreaks.
Sold in bags of 100 pieces.

WOODEN HANDLE

Wooden handle for olive comb.
Sold separately.
Dimensions : 40 cm.

OLIVE COMB

9-tooth plastic comb.
Colour : yellow.
Sold separately.

STEEL CARABINER

Zinc-plated steel carabiner.
Sold in boxes of 50 pieces.
Dimensions : 6 x 60 mm.

RIDGE COMB

Resistant plate for thick, heavy or exposed windbreaks and privacy screens. Ridge cap for hail protection.
(2 clips/metre). Can also be used to connect two Grape Protect nets.

ALL-PURPOSE PLIERS

Maximum cutting diameter Ø4 mm and crimping of sleeves.

2-POINT PLATE

Plate for installing hail protection nets, windbreaks or Alt'Carpo.
Use 3 to 4 clips per metre.
Bag of 500 pieces.

NINA PLATE

Plate for attaching hail protection nets and Alt'Carpo.
Sold in bags of 250 pieces.

RIVA PLATE

Plate for attaching hail protection nets and Alt'Carpo.
Sold in bags of 200 pieces.

WIRE STRAINERS

Ensures tension in wires and cables.
Material : Galvanised steel

Diameter

2 - 3 mm

Colors

Green - White - Black

BUNGEE CORD

For attaching nets.

Diameter

6 - 8 mm

Reel length

100 m

Colors

White - Black

BUNGEE CORD WITH SNAP HOOKS

For attaching nets or tensioning the Gel Protect net.

Diameter

8 mm

Reel length

0.70 - 1.30 - 1.60 - 1.70 - 1.80 - 2 m

CABLE CLAMP

For hail protection and windbreaks. Sold in boxes of 50 pieces. Material : Galvanised steel.

Diameter

3 - 4/5 - 6 - 8 mm

GALVANISED TURNBUCKLES

Tendeur galvanisé.

Diameter

5 - 6 - 8 - 10 mm

Type

1 anneau/1 crochet - 2 anneaux - 2 crochets

TIRANTE NET

Accessory for folding nets. Sold in bags of 250 pieces.

PROTECTIVE TUBE

For Anti-hail and Alt'Carpo. Sold in bags of 50 pieces.

MANUFACTURER'S ADVICE

The Grape Protect net offers economic advantages:

- Significant reduction in labour required for vineyard management.
- Eligible to **France AgriMer** aid
- No specific tools are required for planting and managing the vineyard.

Accessories on page 92

Our manufacturer's recommendations

Focus on the Grape Protect

Grape Protect is a net made from high-density polyethylene, with no Bayco wire.

It helps increase yield. How? By protecting the vines from climate hazards, while also allowing you to reduce labour time.

Moreover, the installation system has been cleverly designed. The accessories make it easy to adjust the net's position according to the season and vine growth.

WHAT DOES IT CONSIST OF?

Grape Protect is a net supplied with all the necessary accessories for installation and repositioning. But what does it actually involve?

- ✦ **A net is positioned on each side of the row.** These nets help with trellising as soon as the vines start budding. They are then rolled up after the harvest until spring.
- ✦ **The accessories are attached directly to the wires.** Simple, double, or 'bretzel' top clips are fitted to the top wire. The lower spreaders are positioned on the bottom wire, and the stake fastenings are attached to the end-of-row posts.
- ✦ **The time required varies from 30 to 60 hours per hectare, with 3 people,** and depends on the density of the planting.

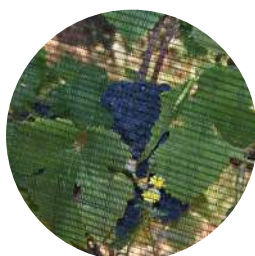

THE GRAPE PROTECT, A MULTI-FUNCTIONAL NET

This net offers several highly useful benefits for its users.

LABOUR SAVINGS

With this net, several tasks will be reduced or eliminated, such as tying up, leaf thinning, pre-cutting, and wood pulling.

PROTECTION AGAINST CLIMATIC HAZARDS

Grape Protect improves farm yields. It is first and foremost an excellent protection against hail, but it also protects against wind and, consequently, protects the branches from breaking.

PHYSICAL BARRIER AGAINST PESTS

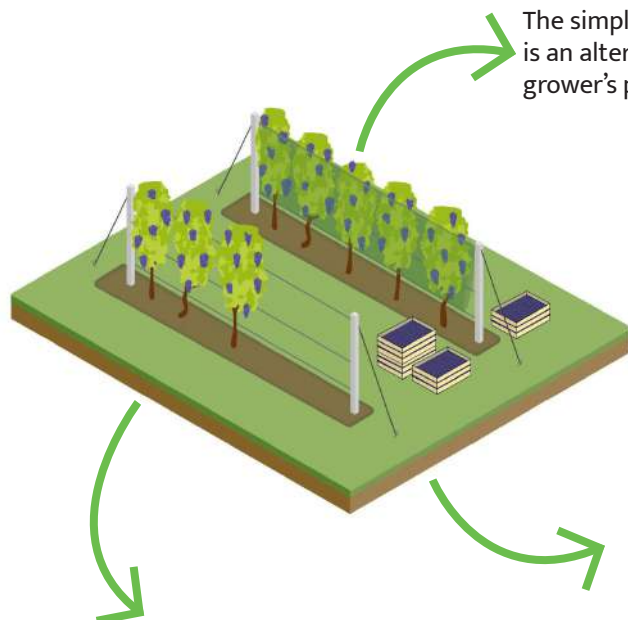

Finally, using Grape Protect means choosing effective protection against large wildlife and preventing birds from eating the grapes

A NET ADAPTABLE ACCORDING TO THE SEASON

Once installed, it can remain in place all year – this is one of Grape Protect's major strengths. Thanks to the various accessories, the installation is modular, allowing growers to adjust the net according to the season and the vine's development. With the installation accessories, the net can be easily fitted onto the vine wires and the end-of-row posts.

ACCESSORIES ON THE TOP WIRE

The simple and double top clips are fitted to the top wire. The 'Bretzel' clip is an alternative to the first two clips, with the choice depending on the grower's preference for installation.

Simple top clip

Double top clip

« Bretzel » clip

ACCESSORIES ON THE END-OF-ROW POSTS

On the end-of-row posts, a Stake Fastening should be fitted. This accessory works together with the Net Tensioner. Once attached, these two components maintain the correct tension of the net.

Stake Fastening

Net Tensioner

ACCESSORIES ON THE BOTTOM WIRE

On the bottom wires, the Lower Spreaders are fitted. Their purpose? To adjust the position and spacing of the net, adapting its shape to the vine's growth.

Gel Protect

GEL PROTECT

SNOW WHITE ULTIMATE

Gel Protect, Snow White Ultimate

This solution has been developed in partnership with growers over several seasons. It is a perfect alternative to candles, remaining economical and easy to install, while also being ecological, reusable, and passive.

Thanks to its special knitting and Snow White Ultimate color, it reflects infrared rays to increase the temperature under the net at night.

This net is highly durable and specifically designed not to create a microclimate when in place.

							4.6m	100m	

MANUFACTURER'S ADVICE

The goal of this net is to create a new opportunity for growers who no longer wish to use polluting candles, frost-fighting towers, or heating wires. Gel Protect is:

- A passive protection that produces no pollution.
- A product that can be reused for many years.
- A recyclable net, as Gel Protect is made from HDPE.

Accessories on page 92

Our manufacturer's recommendations

Focus on Gel Protect

Our Gel Protect net has a clear objective: to prevent buds from freezing during spring cold spells.

To achieve this, our R&D team partnered with several growers to develop a product that is effective, quick to install, and reusable for several years.

After extensive testing, we succeeded in creating a net that combines all these features

GEL PROTECT, AN EXCELLENT SUBSTITUTE FOR CURRENT SOLUTIONS

At the origin of the project, we asked our grower-partners the following question: what challenges do you face in managing late frosts in the vineyard? Their answers highlighted the need for a product that was:

- ✦ A **viable substitute for existing solutions**, which are often too polluting (candles) or too costly or complex to implement (frost-fighting towers)
- ✦ **Less demanding** for workers
- ✦ **Quick to install**
- ✦ **Reusable** and recyclable

Thanks to their experience, we were able to develop an innovative net that addresses all these challenges.

GEL PROTECT, AN INNOVATIVE NET

This net is innovative in several ways

Frozen outside
the net

Not frozen
under the net

GAIN OF SEVERAL DEGREES UNDER THE NET

Thanks to its white color, 'Snow White Ultimate,' and knitted construction, the net reflects the heat emitted by the infrared rays from the soil.

REINFORCED FOR LONG-LASTING DURABILITY

Made with a knitted strip construction, the net is reinforced with polyethylene monofilaments in sensitive areas to withstand gusts of wind.

AN OPTIMISED INSTALLATION METHOD

The accessories and procedure have been carefully designed to provide a rapid response when frost is forecast.

A NET THAT DOES NOT REPLACE GOOD VINEYARD MANAGEMENT PRACTICES

Gel Protect is an effective frost protection solution, provided that good vineyard management practices are followed. Several aggravating factors promote the spread of cold in the vineyard and increase the risk of losses. In addition to using Gel Protect, we strongly recommend that you:

✦ Limit humidity in the plots

- ✦ Control grass growth in the vine row and between rows
- ✦ In the 2 to 5 days before a frost risk, avoid soil work and mowing
- ✦ Avoid using mulch to insulate the soil

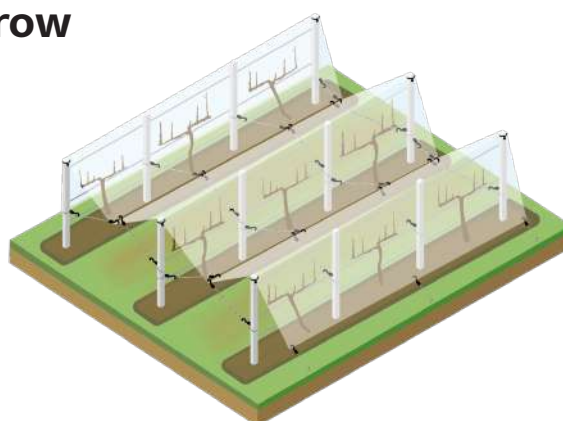

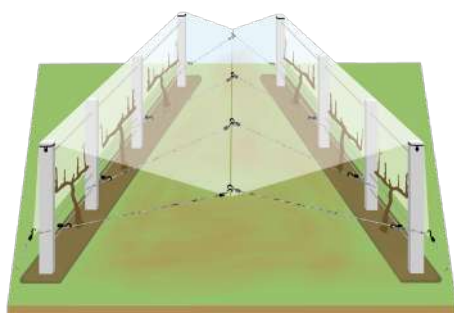

✦ PAY ATTENTION TO PRUNING AND TYING TIMING

- ✦ Opt for a late, two-step pruning
- ✦ Tie and clean the canes at the last moment

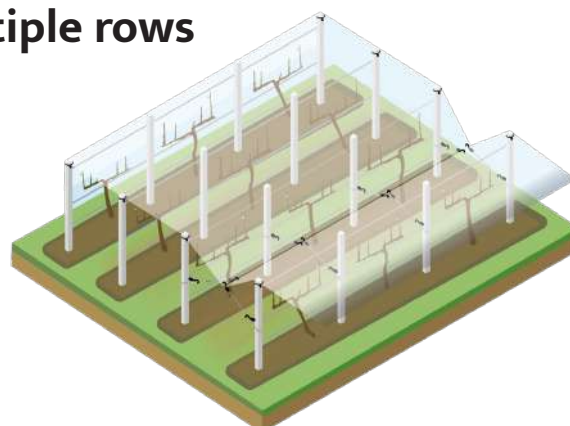

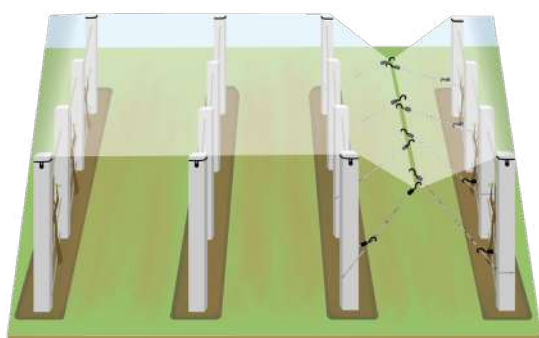

GEL PROTECT, A VERSATILE PRODUCT

Gel Protect's greatest strength is its ability to adapt to all types of vines and fields. You can apply it freely in single or multiple rows, such as:

Gel Protect installed in a single row

Gel Protect installed across multiple rows

To learn more about the benefits and practical use of Gel Protect, our sales teams are available to discuss it with you.

LOW SPREADER For large vines

Keeps the net taut on the bottom wire.

Diameter
3mm
Width
30cm

LOW SPREADER For narrow vines

Allows for close or spaced trellising after flowering.

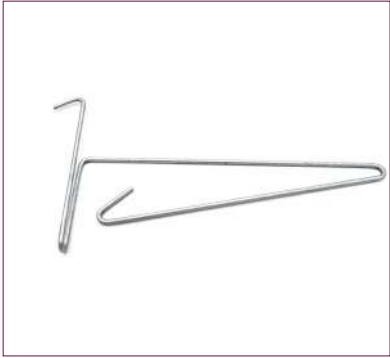

Diameter
3mm
Width
38cm

STAKE FIXING

Attaches to the head stake to hold the net tensioners at the end of the row.

Diameter
4mm
Width
31cm

NET TENSIONER Long rows special

Applies the necessary tension to the row and attaches to the end of the row. Made of stainless steel.

Diameter
6 mm
Width
16 cm
Height
24 cm

PROTECTIVE SHEATH

Box of 250 pieces.

RIDGE COMB

Ridge combs are used to secure the netting.
Sold in packs of 200.

MANUFACTURER'S ADVICE

The products shown on this page are only a selection of our bestsellers.

Our aviary range includes a wide variety of nets in all dimensions, mesh sizes, and thread thicknesses. We sell our products in standard small sizes (5x10 m, 10x20 m, etc.) or in bulk.

These products are also available made-to-measure. For larger quantities, we can manufacture aviary nets according to your specific requirements (color, mesh size, thread thickness, etc.). We can also make them with square mesh.

Our manufacturer's advice

Bird control solutions for buildings

In addition to crop protection, we can offer you a range of bird protection solutions for buildings, warehouses and other storage areas: nets and spikes. These two products complement each other and are highly versatile.

Nets block access points at a low cost, while spikes prevent birds from landing on flat surfaces and gutters.

NETS AGAINST BIRDS

Bird nets are a simple and effective solution for protecting crops, as well as agricultural buildings and storage areas. They prevent birds from entering while maintaining ventilation. Key benefits:

- ✦ They effectively protect **warehouses, silos** and **barns** from bird contamination.
- ✦ They are **weather-resistant** and can be **reused** for several seasons.
- ✦ They preserve the **quality of crops and seeds** by limiting losses.

SPIKES AGAINST BIRDS

Bird spikes are durable physical barriers that prevent birds from landing on roofs, beams, gutters or agricultural structures. Easy to install, they provide long-lasting protection without harming the environment or structures.

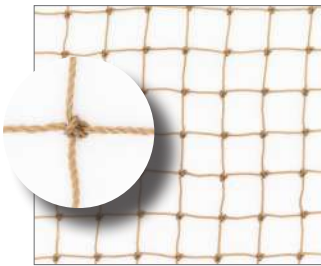

- ✦ Ideal for securing **storage areas, warehouse entrances** and **roof structures**.
- ✦ Made from **rustproof, durable materials**, they are designed for long-term outdoor use.
- ✦ A discreet, effective solution that is **safe for birds**.

NETS AGAINST SPARROW

M1 / Black/red

320Kly

1000kg/sqm

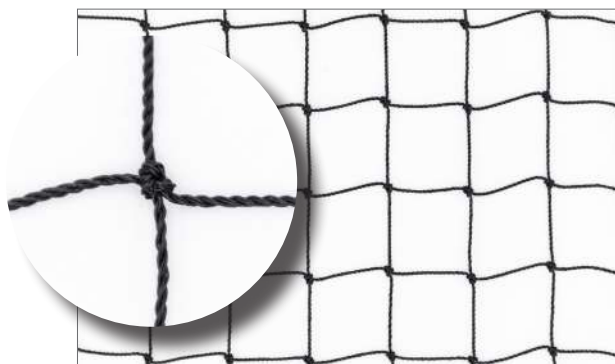

Available
in M1

Our range of 19mm mesh nets against sparrow is available in several colors. It also includes fire-retardant nets classified M1. On request, we can add an overlock, which is not present on standard nets as it is unnecessary for bird-control applications. The net knots are treated in an autoclave, so they do not unravel when cut. All our nets are also available in diamond mesh and often at lower prices (with the option of selvages).

Black net against pigeon

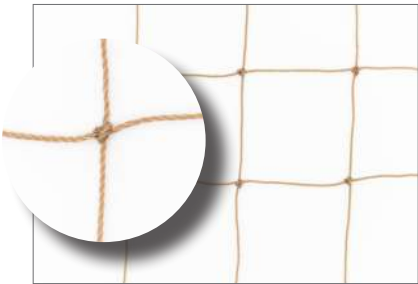

Stone net against pigeon

NETS AGAINST PIGEON

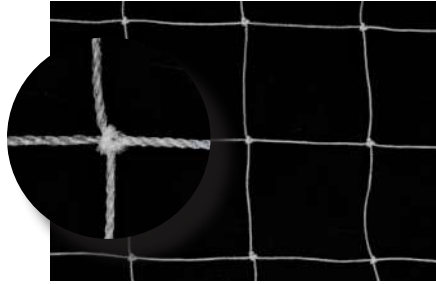

50 mm mesh

Black

Stone

Translucent

Our 50 mm mesh nets against pigeon are available in several colours. These are mainly in polyethylene. The fire-retardant version is self-certified based on the 19 mm mesh, as the 50 mm mesh falls outside the regulatory scope for fire propagation. The net knots are treated in an autoclave, so they do not unravel when cut. They are also available in diamond mesh, with the option to add a selvedge.

PIGEON SPIKES

Alphapic

Our Alphapic pigeon spikes range features a wide, honeycombed base (for better adhesive grip) made of UV-treated polycarbonate. The pins are made of AISI 302 stainless steel, 13 mm in diameter, in accordance with AFNOR X10CRNi18-8, ISO 527, ISO 178, and ISO 306 standards. Our 50 cm modules can be snapped by hand.

PIGEON SPIKES

Easy spikes

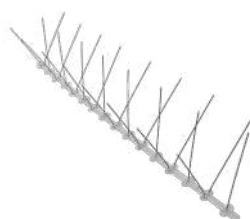

Our Easy Spike spike range against pigeon features a thin, ultra-flexible base, suitable for narrow ledges. Another advantage is that packaging is reduced on certain models because the spikes can be stacked up to 10m of bars. The base is made of UV-treated polycarbonate. The pins are made of AISI 302 stainless steel with a diameter of 13 mm, in accordance with AFNOR X10CRNi18-8, ISO 527, ISO 178 and ISO 306 standards.

Our manufacturer's advice

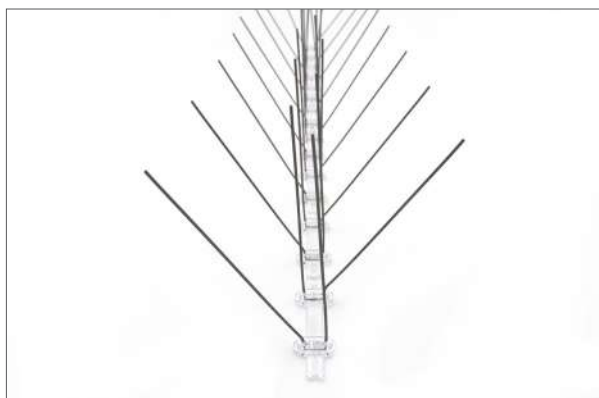

Pigeon spikes

The spikes consist of metal rods fixed perpendicularly to a base.

Easy to install and low-cost, the spikes should be placed across the entire area to be protected to prevent birds from finding a gap. You can have the spike bases made in the color of your choice, for a minimum order of 800 m (regardless of the spike model).

TECHNICAL DATA SHEET

Whether for Alphapic or Easy Spikes, our spikes consist of a UV-treated polycarbonate base, suitable for all surfaces, and 13 mm Ø pins made of AISI 302 stainless steel. Our pins comply with AFNOR X10CRNi18-8 and ISO 527, ISO 178, ISO 306 standards.

- **Tensile strength:** 26 N/mm²
- **Elongation at break:** 250 N/mm²
- **Flexural strength:** 40 N/mm²
- **Flexural modulus of elasticity:** 1450 N/mm²
- **Ball hardness H132/30:** 40N/mm²
- **Softening temperature:** 83 °C vst/A/50
- **Thermal conductivity:** 0,12 W/m.K
- **Hot deflection temperature:** 75 °C

INSTALLATION ADVICE USING SILICONE ADHESIVE

The spikes are fixed using a neutral silicone sealant, supplied in 300 ml cartridges, capable of bonding 10 to 12 linear metres of spikes depending on the surface. This should always be done on a dry, dust-free, solvent-free surface, with application temperatures between +5 °C and +40 °C and service temperatures from -50 °C to +120 °C. If the surface cannot be cleaned, the polycarbonate base of the spike is designed for fixing with screws or nails.

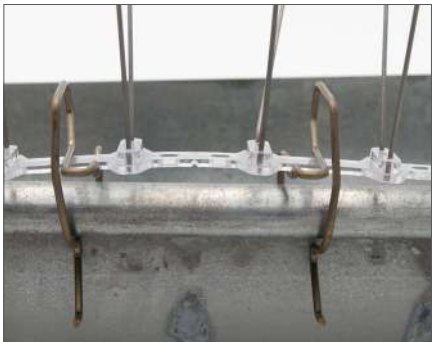

Always apply a wavy bead of adhesive, at least 0.5 mm thick, along the base of the spike. Never pre-apply a long bead of adhesive exceeding one metre on the surface to be protected (cornice, fascia, etc.), as surface polymerisation may occur before the base makes contact, resulting in poor adhesion of the spike. Full curing takes 5 to 8 hours. For any application on a damp surface, a fast-curing adhesive (MS Polymer) must be used.

INSTALLATION ADVICE FOR ALPHACLIP STAINLESS STEEL

The Alphaclip Stainless Steel fits into the base of Alphapic or Easy Spike modules. Use 2 Alphaclip Stainless Steel per 50 cm spike module, i.e., 4 clips per metre. The clip is fixed directly onto the gutter by simple mechanical pressure on the hem (Ø 15 to 25 mm). Once installed, this system prevents pigeons from perching inside the gutter.

ALPHAclip

FOR INSTALLING PIGEON SPIKES ON GUTTERS

Alphapic et Easyspike compatible

Alphapic compatible

The Alphaclip is an Alphetex innovation that allows all our spike models to be installed very quickly, saving labour time. No adhesive, no tools, no screws are needed—simply clip the Alphaclip onto the gutter (compatible with Nantes, square, Lyon, English, and Le Havre-style gutters). Install 4 Alphaclips per linear metre. Note: the Polycarbonate Alphaclip is only suitable for the Alphapic model.

Product	Material	Applications	Packaging
Alphaclip inox	Stainless steel	Wire Ø: 2 mm	Box of 100 pieces
Alphaclip polycarbonate	Polycarbonate	H: 65 mm / L: 87.5 cm / W: 20 mm	Box of 100 pieces

SNAIL FARMING NETS

For snail farming, we offer several ranges of nets to meet breeders' needs. First, our Alphavent 50 and 55 windbreak nets are ideal for protecting snails from the wind.

To shield them from the sun, we recommend the Alphaombre 55 and 60 nets in green or black. Finally, for effective bird protection, our Arbotex net range against birds is perfectly suited to your requirements.

WINDBREAK NETS - ALPHAVENT

Alphavent 50

Alphavent 55

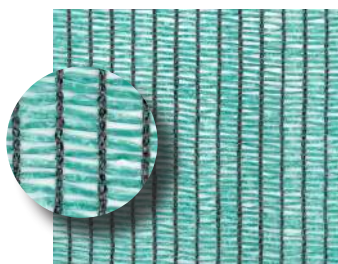

These windbreak nets offer 50% and 55% filtration. They also combine ventilation and strength. Made from HDPE and treated with UV protection (600 KLY), they have a long lifespan.

Find all the information about these products on pages 26 and 27.

SHADE NETS - ALPHAOMBRE

Alphaombre 55

Alphaombre 60

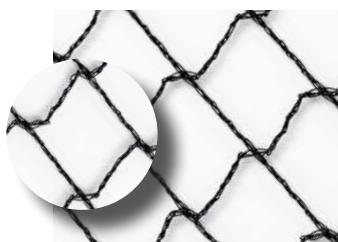

Alphaombre 55 and 60 nets offer shading rates of 50% and 62% respectively. They are perfectly suited for installation on structures and also benefit from 600 KLY UV protection.

Find all the information about these products on pages 30 to 33.

NETS AGAINST BIRDS - ARBOTEX

Arbotex 13

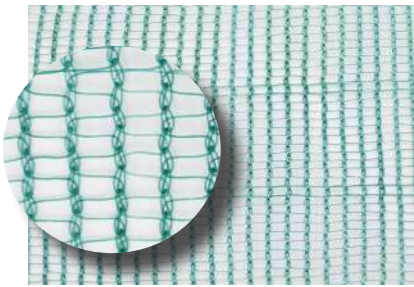

Arbotex 22

Made from HDPE with mesh sizes ranging from 13 to 25 mm, these nets are highly effective at stopping birds. Our main advantage? A wide variety of sizes in stock to meet all your needs.

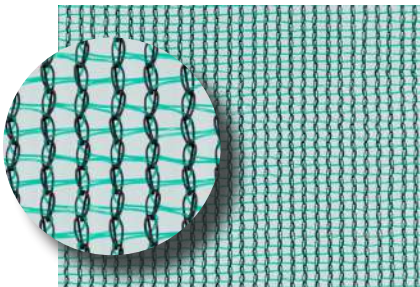

Find all the information about these products on pages 60 and 61.

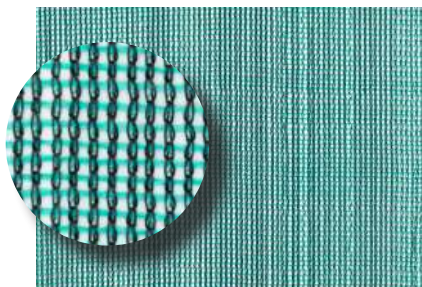

AMPHIBIAN PROTECTION NETS

BATRA 25

BATRA 50

BATRA 55

We also offer nets specially sized for constructing barriers and tunnels for amphibians, helping to divert them away from roads.

Kit for 500 m of net	3 bags of 100 cable ties – 1 spool of 500 m wire – 256 stakes			
Kit for 750 m of net	4 bags of 100 cable ties – 2 spools of wire (250 m + 500 m) – 376 stakes			

Climafrost

Alphavent 30

MANUFACTURER'S ADVICE Which net for which pests?

Our nets are designed to protect against a variety of pests. Our fine meshes can safeguard crops from larger insects, while medium-sized meshes are recommended for game, birds, and rodents.

PROTECTION AGAINST LARGE INSECTS, GAME, ETC.

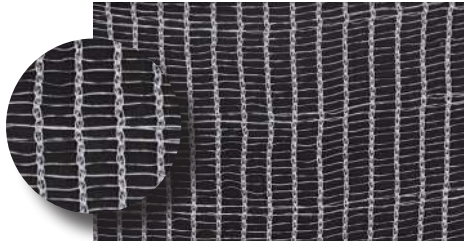

END OF PRODUCTION

Climafrost

Alphavent 20

Alphavent 30

Our nets can also be used to protect crops against certain pests such as rabbits, pigeons, and grasshoppers. They are therefore suitable for market gardening, providing protection against damage caused by game, birds, and large insects on seedlings and young plants.

The nets can be placed directly over the crops, on hoops, or used as vertical protection.

Product	Mesh	Constr.	UV treat	Color	Width	Length	Finishes	Weight
Climafrost	Triang. >1200µ	100% knitted strips	600 KLY	Crystal	16m	100m	Top and bottom reinforcements 5 cm	38g/sqm
Alphavent 20	Rect. 2,3 x 7 mm	Knitted	500 KLY	White	De 5 à 15m	200m	Eyelets on sides	50g/sqm
				White	3m	500m	Side reinforcements	50g/sqm
				Green	2.5m			
Alphavent 30	Rect. 2 x 3mm	Knitted monofilament strips	600 KLY	Crystal	1.3 - 2 - 2.5 - 3 - 4 - 6m	200m	Side reinforcements	70g/sqm

Pro Solar Bird

EOLO Falcon

Product	Material	Dimension	Usage instructions
Pro Solar Bird	Aeronautical grade carbon and fibreglass mix	2.20 m wide	Protects up to 8 standard-size solar panels. Special attachment system for secure installation and a maximum tilt of 15%. Once installed, there is no reduction in energy output, as fewer droppings accumulate on the panels, reducing the need for frequent cleaning.
EOLO Falcon	Carbon handle Durable, nearly invisible wire Polyester bird	Up to 13 m high (mast + wire)	It flies with a light breeze, reaching up to 13 m high. We recommend installing 4 per hectare in orchards and 6 per hectare in cereal fields.

Our manufacturer's advice

Which net for which animals?

To protect your animals, we offer a complete range of nets with different mesh sizes. The table below shows the mesh size corresponding to your type of livestock.

Animal type (farming or protection)	Fine mesh 2x3 mm, 2x4 mm	Mesh 13 - 25mm	Mesh 25 - 35mm	Mesh 40 - 60mm	Mesh 60 - 100mm
Snails	●				
Frogs, toads	●	●			
Sparrows		●			
Quails		●			
Pheasant chicks		●			
Young partridges		●	●		
Adult partridges		●	●		
Hens			●	●	
Birds of prey				●	
Young pheasants (weight under 1.2 kg)				●	
Red-legged partridges		●		●	
Crows		●		●	
Pigeons				●	
Rabbits				●	
Pheasants (weight over 1.7 kg)				●	
Hérons				●	
Turkeys				●	
Wild boars					●
Foxes					●
Deers					●

DIY range

Special store products
For retail customers

We also offer customizable products
for stores.

These nets, spikes, and accessories are sold in
smaller sizes and quantities to meet the needs of
retail customers.

Do It Yourself
by Alphatex

NET AGAINST BIRDS

Small bird nets are packaged in
pouches, ideal for selling in shops.

BIRD SPIKE PACKS

Our bird spike packs are available in
1-metre boxes for self-assembly, or
in 10-metre boxes with glue, already
assembled.

NETS AND SPIKES FOR CATS

Primarily aimed at private customers, our
nets and spikes prevent cats from passing
through without harming them.

**ALL REFERENCES AND AVAILABLE SIZES CAN BE FOUND
ON PAGES 126 AND 127**

Alphatex

DIY – EXTENDED TO ALL OUR PRODUCTS

Choose from A to Z: from the product to the packaging!

Many products, whether for construction, agriculture, or landscaping, can be
customised for retail sale. For more information about our DIY solutions, request our
brochure from your sales contact.

References p. 135

DOUBLE-SIDED TAPE

Used for installing nets and tarpaulins on frames or fencing.
Material: braided HDPE

STAPLER / STAPLES

Bostitch SR8 stapler with P7 magazine – SR8 staples supplied in boxes of 2,500 pieces.
For attaching nets onto wire or cable, coated or uncoated.
Stapler and staples sold separately.

SELF-ADHESIVE TIES

For installing nets indoors.

COATED STEEL CABLE

Used for installing nets and tarpaulins on frames or fencing.
Material: galvanised steel and PVC.

Diameter

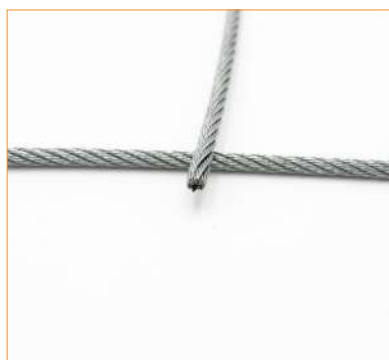

5 - 6 - 7 mm

Spool length

50m to 200m or cut to length

Colors

Dark green – Dark green translucent
– Black – Light green – White – Grey –
Transparent

GALVANISED STEEL CABLE

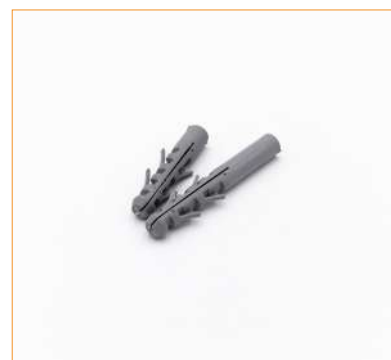

Used for installing nets and tarpaulins on frames or fencing.
Material: 7x7 galvanised steel.

Diameter

2mm

Spool length

100 - 200 m

SCREW ANCHORS

Used for installing nets and tarpaulins on frames or fencing.
Material: braided HDPE

IPN CLIP

Allows nets to be fixed to all types of IPN metal beams.

Dimensions

2 to 4 mm - 4 to 7 mm - 8 to 12 mm

Diameters

6-7 mm - 9-10 mm - 15-18 mm
19-24 mm

SILICONE ADHESIVE

Used to install spikes on all types of surfaces.

1 tube = 10-12 linear metres of spikes.

Tube: 300 ml.

HDPE TENSION WIRE

Used for installing nets and tarpaulins on frames or fencing.
Material: cabled HDPE.

Diameter

3 - 4 - 5 - 6 - 8 - 10 mm

Spool lengths

100 - 200 - 250 - 500 m

Colors

Black - Green - Stone - Green/Blue
- Dark green - Aqua green - White -
Grey - Red

SYNTHETIC WIRE

Synthetic wire on a 1,370 m spool

SLEEVES

Crimping sleeves in aluminium.

For thin cable: 0.55 mm to 0.65 mm.

For thick cable: 2, 2.5, 3.5, 4, 5 mm.

Bag of 100 pieces.

MULTI-PURPOSE PLIERS

Maximum cutting Ø4 mm and crimping of sleeves

References p. 135

EYE BOLT

Eye bolt for fixing nets onto solid supports

CABLE TIE

Box of 50 pieces.
Material: galvanised steel.

Diameter

3 - 4 - 5 - 6 - 8mm

LANTERN TURNBUCKLE

For correctly tensioning your nets.

Diameter

5 - 6 - 8 - 10mm

QUICK TENSIONER

For tensioning and securing the cable. Double-channel self-locking mechanism.

Diameters

1.50 à 2.50 mm

SPECIFIC FINISHES

FOR PRIVACY AND WINDBREAK NETS

Our privacy nets are available in a 'raw cut' finish or with **buttonholes**. In addition, our manufacturing teams can add **bands** and **eyelets** to any type of privacy screen. Discover the different finishes available for our privacy screens below.

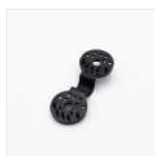

WITHOUT BUTTONHOLES

DISCONTINUED ITEM

Raw-cut privacy screens are the most standard and economical type. **They are manufactured without reinforcements or buttonholes on the sides.**

To install them, we recommend using black round clips (for lightweight models, up to 150 g/sqm) or green clips (for heavier models, weighing more than 150 g/sqm).

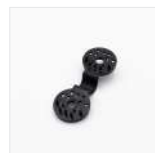

WITH BUTTONHOLES

These models feature buttonholes and reinforcements on the sides. It is **easier to install and ensures that the net has a longer lifespan.**

To install them securely and quickly, you can opt for zip ties or clips.

BANDS AND EYELETS

Privacy screens with pre-made strips and eyelets are the most durable, attractive and quickest to install.

Below you will find all the strip colors available in our catalogue:

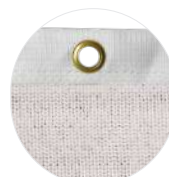

Black

Dark grey

Light grey

White

Orange

Brown

PRIVACY NETS

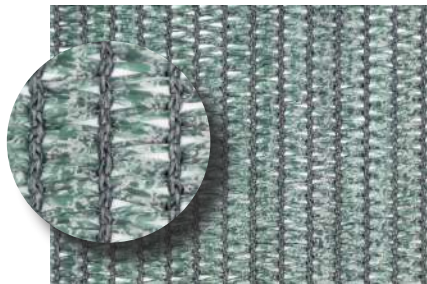

FROM 75 TO 90%

Alphavue 75

Alphavue 85

Alphavue 90 LG

Our range of privacy nets, offering 75% to 100% coverage, are available in standard and custom sizes, allowing us to respond quickly to our customers' requests. Alphavue nets are made from 100% HDPE strips and are UV-treated. These privacy screens can be installed on existing structures such as barriers, fences, wire mesh or posts. Installation is simple thanks to our accessories, which you can find at the end of the catalogue.

MANUFACTURER’S ADVICE

Our Alphavue 100 nets provide complete privacy. Installed around a building site, simply in a garden or on a balcony, they will protect you from the prying eyes of passers-by.

To make it easier for you to install our privacy screens, we offer a range of dedicated accessories. These accessories make it quicker and easier to attach the privacy screen. You can install the screen on wire fencing, a fence or a cable, for example.

MANUFACTURER OF ALL TYPES OF SPORTS NETS

We can also manufacture a wide variety of sports nets, including ball nets, goal nets and basket nets for basketball, hockey, handball, volleyball, tennis, badminton, padel tennis and more.

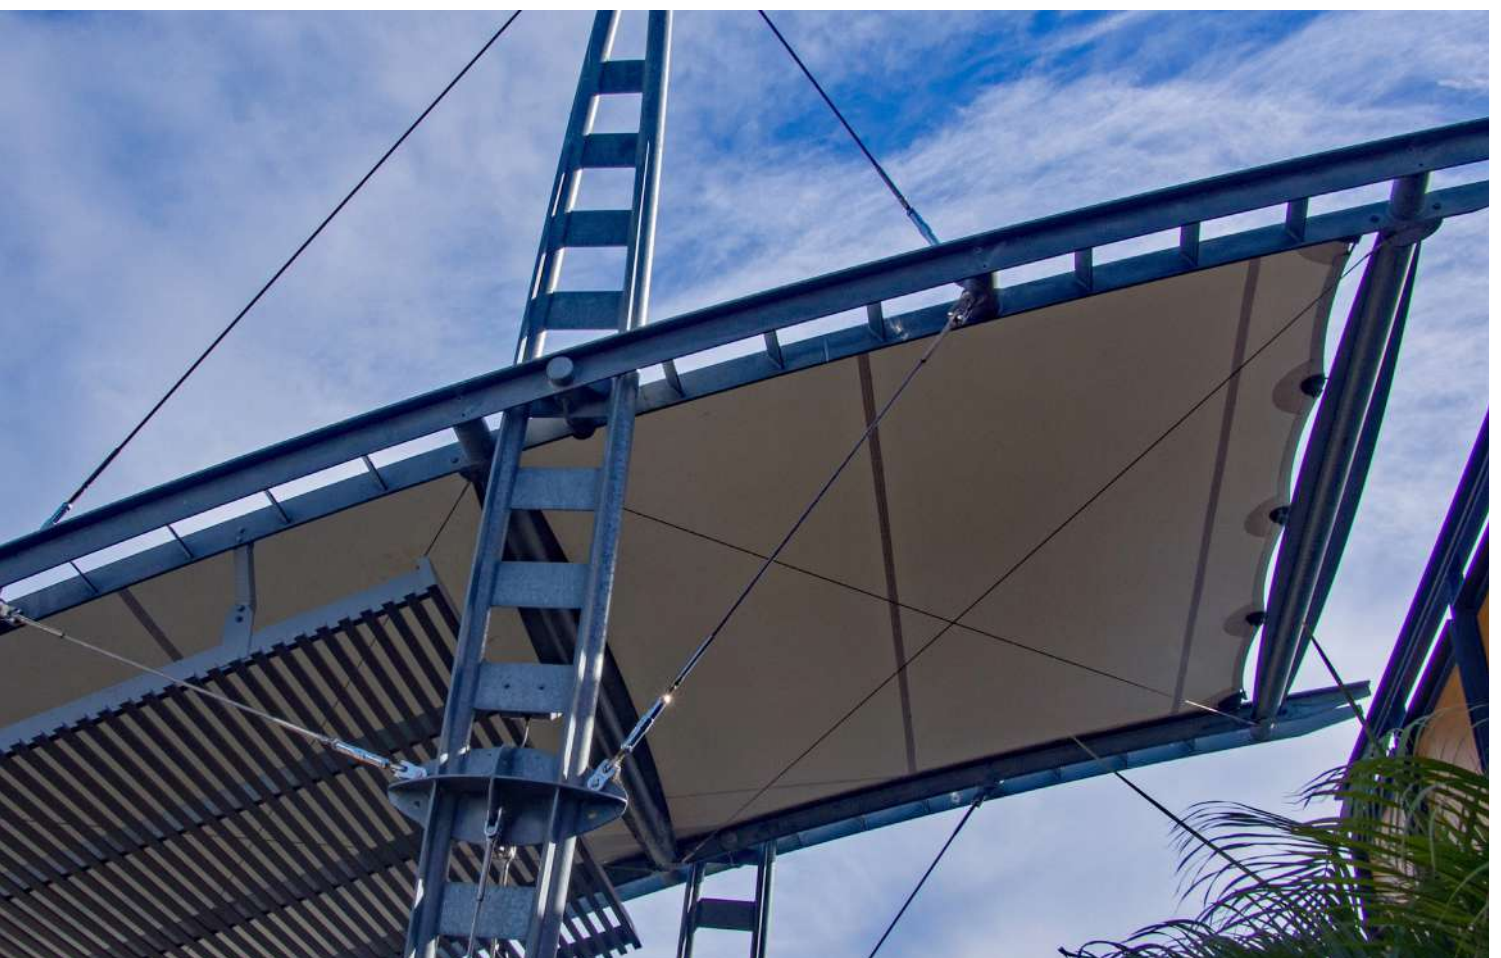

These items are not listed in this catalogue, but we can accommodate all types of requests.

Please contact us for more information.

650g/sqm tarpaulin

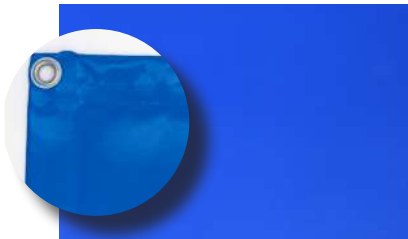

900g/sqm tarpaulin

PVC TARPAULINS

650g/sqm grey tarpaulin

650g/sqm blue tarpaulin

650g/sqm red tarpaulin

900g/sqm green tarpaulin

900g/sqm white tarpaulin

900g/sqm yellow tarpaulin

Our 650 g/sqm and 900 g/sqm PVC tarpaulins are designed to meet the requirements of a wide variety of applications: pergola covers, event stage protection, temporary or permanent installations in green spaces, swimming pool and pond covers, etc. Made to measure, they can be adapted to any configuration. Their welded hem and eyelet finish guarantees excellent durability and quick installation. Weather and UV resistant, these tarpaulins are the ideal solution for combining protection, aesthetics and durability.

Product	Material	Weight	UV tr.	Size	Colors	Finishes
650g/m² tarpaulin	Polyester PVC coated	650 g/sqm	300 KLY	Made-to- measure	Blue, yellow, black, green, white, ivory, grey, dark grey, red, sand	Welded hem and eyelets

BUBBLE COVER

We can also supply bubble pool covers for round or rectangular pools. These covers help to keep the water clean while naturally increasing its temperature. They also reduce water evaporation.

These covers are made to order, so feel free to contact us for any specific requirements.

Covertex 150 CD

Covertex 200

SKIP NETS

Covertex 150 CD

Covertex 200

Use skip nets for safe transports! They are very resistant thanks to: a heavy HDPE woven band, protected with a UV treatment, double machine stitch with a thick sewing thread and 14mm diameter eyelets every 50cm.

Dimensions shown below are in stock and ready to be delivered.

Product	UV tr.	Constr.	Color	Weight	Width	Length	Finishes

			Dark green		Made-to-measure	1.5 m - Made-to-measure	
Covertex 200	600 KLY	Knitted	Black	200 g/m²	3 m	4 m	Bands and eyelets every 50cm with or without sandow
					3.5 m	5 - 5.5 - 6 - 6.5 - 7 - 7.5 - 8 m	
			Made-to-measure		Made-to-measure		
			Green/ Black		3.5 m	100 m	

MANUFACTURER’S ADVICE

Our Covertex range is mainly used as skip protection for transport companies, particularly in the environmental sector (waste treatment, etc.).

However, thanks to its fine mesh and robust monofilament construction, our Covertex products can be used in a wide range of other applications, including pond protection, shredder guards, trailer nets, partitions and building dividers.

OUR ACCESSORIES

We offer two very useful accessories for landscape fabrics users: staples and thermal perforator. The serrated steel staples with bevelled ends enable any type of mulching fabric to be installed securely and durably.

The **staples**, made of serrated steel with bevelled ends, enable quick, secure and durable installation of mulching fabric.

The **perforator** is very useful when planting. It allows you to drill holes easily and very quickly.

The proof that grass does not grow underneath!

P7 STAPLER

SR8 Bostitch stapler with P7 magazine - For the installation of nets using wires and cords with or without sleeves. B SR8 galvanised metal staple - 2,500 pieces in a package.

SR8 STAPLES

Galvanised metal staples B for SR8. Sold in box of 2,500 pieces.

SPLIT RINGS

Split rings used to attach nets to wire or cable. Colors: Grey, Black, White, Green.

Size
21x41mm

C OR S CLASP

C or S Gancio clasp. Sold in 1,000 pieces.

PVC COATED CABLE

It is used to install nets and tarpaulins on structures or fences. Material: galvanised steel and PVC.

Diameter
5 - 6 - 7mm
Coil length
50m to 200m
Color

Article I

SCOPE

The present General Terms and Conditions of sale apply to all sales concluded by Alphetex with professional buyers, regardless of the clauses that may appear on the customers' documents, in particular their general terms and conditions of sale, with regard to the following products :

- Netting in HDPE, PA, PES, PP - Tarpaulins in HDPE, PVC, PES, etc. - Installation accessories - Digital printing work - Fire-resistant shrinking films and accessories - Abbestos products - Pikes - Shutters - Combs - Closures and installation accessories - Custom-made nets.

Article II

PRODUCTS

In theory, the products delivered comply with the descriptions in the catalogues and comply with the samples sent. However, the supplier reserves the right to modify or discontinue the product, whether for safety reasons, manufacturing practices or improvements to the product, or changes in the related standards in force. In the event of a pending order for a product that has been modified in this way, the supplier's only obligation is to deliver the product ordered, replacing it with the newly manufactured product or failing that a higher-quality product. For our custom-made nets, our dimensions are always calculated between two rows of knots, knot center to knot center, dry net and under a normal tension. Manufacturing tolerance + or - 5%.

Article III

ORDER ACCEPTANCE AND PRICES

Orders taken by the supplier's employees or any other duly authorised person at the company, are only definitive following receipt of a purchase order as per the quote, a copy of which must be dated and signed by a person authorised by the Purchaser and sent to the Supplier. The products are provided at the rates indicated in the attached pricing schedule, or as the case may be, in the business proposal addressed to the customer.

These prices are firm and cannot be revised during their period of validity, which is 30 days, without the Supplier's express authorisation.

For any order under 150€ excl. Tax, an administrative service will be charged 29€ excl. Tax.

Article IV

PAYMENT TERMS

The price may be paid in cash with a 1.5% discount on receipt of the invoice, excluding special conditions, by bill of exchange accepted within 30 days from the date of invoice or by transfer.

Bills of exchange must be sent within 8 days. In the event of non-compliance with this deadline, the Supplier shall be entitled to demand immediate payment of all invoices due,

including those that are not yet payable and suspend all pending or delivery phase orders, without prejudice to our rights to damages, where appropriate. Any invoices not paid in compliance with the preceding contractual conditions or individually agreed conditions, shall automatically accrue interest and surcharges at a rate 10 points higher than the Bdf's bank rate, with no further procedures nor prior formal notice.

This clause may not in any way be prejudicial to the payability of the debt. Moreover, any delay in payment shall automatically result, at the Purchaser's expense, in compensation, by way of a penalty clause, equal to 15% of the unpaid invoice, which will be recovered by the Supplier's legal department in compliance with articles 1152 and 1126 of the French Civil Code. The cost of returning unpaid goods shall be paid by the drawee.

Article V

DISCOUNTS, REBATES and REDUCTIONS

In the event of quantitative rebates or reductions; the Purchaser may benefit from discounts, rebates or reductions, in return for participating in a Marketing or Sales campaign on behalf of the Supplier.

Article VI

DELIVERY AND SHIPPING FEES DELIVERY

LIVRAISON

The delivery date provided is for information purposes and is an estimate.

This date is not a fixed deadline and the Supplier cannot be held liable towards the Purchaser in the event of late delivery not exceeding one week. The products may be delivered to any other place specified by the Purchaser, subject to one week's notice and a minimum deadline of 72 hours, entirely at the Purchaser's expense. In the event of delivery to another place specified by the Purchaser, they shall provide the Supplier with precise information about the persons authorised (and under the Purchaser's responsibility) to receive the ordered products.

If the Purchaser makes special requests with regard to the specific packaging (including metal racks which must be returned and are the inalienable property of the Supplier) or transportation conditions for the goods ordered, which are accepted in writing by the Supplier, the related costs shall be subject to specific additional invoicing. The Purchaser must check the appearance of the products on delivery. Unless explicit reservations are made by the Purchaser on delivery, the goods delivered by the Supplier will be considered compliant with the order in quantity and quality.

The related transfer of risks of loss and deterioration to the Purchaser, shall occur as the goods leave the Seller's warehouse.

It is the Purchaser's responsibility to check the condition of the packages delivered, indicate any reservations on the transporter's delivery slip, and confirm these reservations by letter with acknowledgement of receipt within the legally prescribed 48 hours to the transporter and inform the Supplier in writing within the same deadline. No claim may be accepted if the Purchaser does not comply with these requirements. The Supplier shall promptly, and at its own expense, replace the goods delivered whose non-conformity has been proven by the Purchaser. The Purchaser must send us the complaint specifying the reservations made to the carrier and the photos of the merchandise. The claim will be admissible as soon as the Purchaser has fully fulfilled the above criteria. Failure to comply with these formalities will result in the loss of any recourse against the carrier, and in fact prevents us from taking into account any claim for compensation and/or reimbursement.

SHIPPING COSTS

Prices are established ex works. Shipping costs are additional.

Article VII

TRANSFER OF OWNERSHIP - TRANSFER OF RISKS - RETENTION OF TITLE

The transfer of ownership of the goods from the Supplier to the Purchaser, will be effective only after full payment of the price agreed, regardless of the delivery date of such products. It is nevertheless expressly stipulated that the Purchaser shall be responsible for the goods in their possession following physical delivery. If the Purchaser fails to pay all or part of the price, the Supplier retains ownership of the goods sold until full payment is received, allowing it to claim the goods in the event of non-payment.

Any deposit paid by the Purchaser will remain the property of the Supplier by way of compensation, without prejudice to any other courses of action they are legally entitled to take against the Purchaser.

Article VIII

THE SUPPLIER'S RESPONSIBILITIES - GUARANTEES

The products delivered by the Supplier are covered by a warranty period in accordance with the needs specified by the Purchaser, who stipulated the terms on confirming the purchase order. In compliance with the legal provisions, the Supplier guarantees the Purchaser against any hidden defects due to defective material, design or manufacture affecting the delivered goods rendering them unfit for use. All warranties are considered void in the event of wrongful use, negligence or lack of maintenance by the Purchaser, and for normal wear and tear of the goods or force majeure. To assert its rights, the Purchaser must, under penalty of invalidating any other relevant actions, inform the Supplier in writing of these defects within a maximum of six months of their discovery.

The Supplier shall replace or repair the guaranteed goods or parts deemed faulty. This guarantee only covers the

goods «on the ground» and in no case the labour costs related to their removal and reinstallation (excluding special agreements).

The replacement of faulty goods or parts shall not extend the warranty period fixed above. Administrative fees of 29 € excl. tax will be charged for any return of conforming goods due to an order error made by the client.

Article IX

ELECTION OF DOMICILE AND COMPETENT COURT

In the event of dispute, the Rouen Commercial Court shall be the sole competent authority. All orders automatically presume that the Purchaser has accepted the Supplier's general terms and conditions of sale, notwithstanding any contradictory stipulations in their own general terms and conditions.

ARTICLE X

APPLICABLE LAW

All clauses in the present general terms and conditions of sale, and all purchases and sales described herein, are governed by French law.

Article XI

INTELLECTUAL AND COMMERCIAL PROPERTY CLAUSE

All of the Supplier's documents are protected by patents filed with the INPI (National Institute of Industrial Property) and WIPO and by current laws on industrial and commercial property. Any full or partial reproduction by any means will be prosecuted in the relevant courts. For the diffusion of Alphetex supports, a written authorization validated by our marketing department is required.
